

First Announcement

NuSTAR Annual Meeting-2006

The annual NuSTAR meeting will be held at GSI from Wednesday 22-Friday 24th February. The meeting will begin after lunch on the Wednesday and continue until Friday afternoon. A detailed programme will follow in a few weeks but you should note the dates in your diary now.

The programme will include *inter alia* reports on FAIR, NuSTAR and FRS physics as well as the NuSTAR Council and GENCO meetings on the Wednesday and Thursday evenings respectively. This year half a day will be devoted to SPIRAL2, arranged in conjunction with Marek Lewitowicz, the Scientific Director of SPIRAL2. This is part of our efforts to engage in close collaboration with SPIRAL2 in terms of R&D.

A website for registration is already in operation. More information will follow in a few weeks time.

W.Gelletly

On behalf of the NuSTAR Board
